

Versuche, die Zahlen zu entschlüsseln!

Beispiele:

$$\text{VIII} = 5 + 1 + 1 + 1 = 8$$

$$\text{IX} = 10 - 1 = 9$$

$$\text{LII} = 50 + 1 + 1 = 52$$

Zuerst ergänze!

$$\text{XVI} = \underline{\quad} + \underline{\quad} + \underline{\quad} = 16$$

$$\text{CXX} = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = 120$$

$$\text{MCCL} = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = 1250$$

$$\text{XL} = \underline{\quad} - \underline{\quad} = 40$$

$$\text{XC} = \underline{\quad} - \underline{\quad} = 90$$

Nun schreibe selbst!

$$\text{XI} = \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{XXVI} = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{LVI} = \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{LXXVI} = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{CXXI} = \underline{\quad} + \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{CD} = \underline{\quad} - \underline{\quad} = \underline{\quad}$$

$$\text{CM} = \underline{\quad} - \underline{\quad} = \underline{\quad}$$

Kannst du das auch lösen?

$$\text{CDV} = \underline{\quad} - \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{XLVI} = \underline{\quad} - \underline{\quad} + \underline{\quad} + \underline{\quad} = \underline{\quad}$$

$$\text{CMX} = \underline{\quad} - \underline{\quad} + \underline{\quad} = \underline{\quad}$$
